

READY-FOR-SURGERY™ SOLUTIONS

HEADLESS COMPRESSION SCREWS

FEATURES

- Head Design – Tapered design to facilitate fragment compression.
- Compression – Pitch differential between the leading and trailing thread maximizes and maintains compression.
- Aggressive Screw Tip – Self-drilling and self-tapping flutes for smooth insertion even in dense cortical bone.
- Ready-For-Surgery™ – All Headless Compression Screws are individually sterile packaged to reduce the potential of infection.

Flower Small Headless & Cannulated Screws Portfolio

SURGICAL BENEFITS

- Proximal Head has tapered design to facilitate fragment compression.
- Pitch differential between the leading and trailing thread maximizes and maintains compression.
- Threads have aggressive self-drilling and self-tapping flutes for smooth insertion even in dense cortical bone
- CoCr wires to immobilize and stabilize bone fragments and ensure correct position when inserting screws
- Robust single-use instrumentation reduces surgical steps and improves efficiency

SURGICAL BENEFITS

- Self-drilling and self-tapping flutes for easy insertion into cortical bone
- CoCr wires to immobilize and stabilize bone fragments and ensure correct position when inserting screws
- Available in 2.0 & 2.4 diameters
- No instrumentation learning curve. The same instruments are utilized across the small screw portfolio.

- ✓All Screws are Individually Packaged
 - ✓CoCr Guide Wires
- ✓Robust Single Use Instrumentation
 - ✓Eliminating Reprocessing
 - ✓Reducing Surgical Steps
 - ✓Improving Surgical Efficiency

Flower Medium Headless & Cannulated Screws – Portfolio

HEADLESS 3.0mm & 4.0mm

PARTIALLY THREADED 3.0mm & 4.0mm

1.1 CoCr Wire

T15 Torx

Self-cutting Flutes

Shaft Threaded Diameter	Minor Shaft Diameter	Max Head Diameter
3.0	2.0	4.7
4.0	2.6	5.0

Shaft Threaded Diameter	Minor Shaft Diameter	Max Head Diameter
3.0	2.0	4.3
3.5	2.4	5.9
4.0	2.6	5.9
4.5	3.0	5.9

Flower Medium Headless & Cannulated Screws – Surgical Benefits

- Proximal Head has tapered design to facilitate fragment compression & sits flush in bone
- Pitch differential between the leading and trailing thread maximizes and maintains compression
- Threads have aggressive self-drilling and self-tapping flutes for smooth insertion

- Low Profile head design for maximum compression
- Self-tapping and self-cutting flutes to ensure cortical bone engagement
- Available in 3.0, 3.5, 4.0 & 4.5 diameters

Guide Wire Kits

Next Generation Instruments for Cannulated Screws

The Flower Guide Wire Kits contain the instruments required for cannulated screw placement. Each sterile instrument kit contains a cannulated screw driver with a textured handle for robust grip, a dual purpose depth gauge and countersink, and two guide wires. The Guide Wire Kits are individually packaged, single-use and Ready-for-Surgery™.

Guide Wire Kit Contents

Cannulated Screw Driver

- T6 (Small), T15 (Medium) and T25 (Large)
- Textured handle with flats

Cannulated Depth Gauge & Countersink

- Dual Instrument
- Sharp countersink tip provides easier cutting

Guide Wires

- Cobalt chrome 0.8mm (Small), 1.1mm (Medium)
- Stainless steel 2.0mm (Large)

Cube Size	Screw Diameters	Part No.	Description	Contents of Kit
Small	2.0mm/2.4mm	GWK 100	Small Guide Wire Kit, 2.0mm/2.4mm	T6 (Small) cannulated screw driver, cannulated depth gauge and countersink, guide wires (2) 0.8mm x 160mm (CoCr)
Medium	3.0mm/3.5mm/ 4.0mm/4.5mm	GWK 200	Medium Guide Wire Kit, 3.0mm/ 3.5mm/4.0mm/4.5mm	T15 (Medium) cannulated screw driver, cannulated depth gauge and countersink, guide wires (2) 1.1mm x 160mm (CoCr)
Large	5.5mm/6.5mm/ 7.3mm	GWK 300	Large Guide Wire Kit, 5.5mm/6.5mm/ 7.3mm	T25 (Large) cannulated screw driver, cannulated depth gauge and countersink, guide wires (2) 2.0mm x 160mm (SS)

INDICATIONS FOR USE: The Flower Orthopedics Flower Bone Screws set is intended to be used for the fixation of bone fractures, fusion of joints or bone reconstruction.

Cannulated Screw Insertion

Step 1: Guide Wire Fixation

- Insert one of the guide wires found in the Flower Guide Wire Kit.

Step 2: Countersinking and Depth Measurement

- Countersinking for the cannulated screw may be achieved utilizing the cannulated depth gauge/countersink.
- Slide the depth gauge over the guide wire and countersink before reading the depth measurement.
- If countersinking is not desired, simply slide the depth gauge over the guide wire and measure the required screw length with the tip of the countersink on bone.

Step 3: Drill Pilot Hole

- Drill pilot hole using a cannulated drill bit.

Step 4: Screw Insertion

- Using the cannulated screw driver insert the cannulated screw over the guide wire.

Step 5: Final Construct

HOW DOES FLOWER ORTHOPEDICS BUILD A MORE EFFICIENT CASE?

FLOWERCUBES™

FlowerCubes™ are pre-packaged and ready for use, eliminating costly pre-op sterilization. The FlowerCube contains all of the implants and instruments required for specific surgical indications.

IMPLANT PORTFOLIO

Our full line of Foot & Ankle solutions covers forefoot to ankle with plating and screw solutions. The consistent screw head design maximizes efficiency.

READY-FOR-SURGERY WITH

EVERYTHING YOU NEED

E-KIT ADVANCED™ + ONE ADDITIONAL KIT

Yes, you can do a full Foot & Ankle case with two sterile-packed instrument kits!

The E-Kit Advanced streamlines the surgical steps by providing multifunctional instruments for both plates and screws.

When combined with an additional sterile-packaged kit, such as a drill bit kit, you will have all the tools required for a procedure, eliminating operating room back table clutter.

The robust, single-use instruments are new every time. FlowerCubes eliminate the traditional wear and tear of instrumentation and post-op decontamination.
